TEXT:

CHICAGO, Feb. 2 /PRNewswire/ - **Legacy . com** (formerly ObitDetails.com) is an online service that effectively redefines how families memorialize loved ones. With the **Legacy . com** site, family members now have the opportunity to remember loved ones with full-length, lasting memorials on the World Wide Web.

A powerful, positive name  
According to Stopher Bartol, President and CEO of **Legacy . com** , Inc., the company's new name was chosen to better reflect the goals of the Web service.  
"Everyone leaves behind a legacy. It might include children and grandchildren, service to country or community, or professional and personal success. Every life yields a legacy that deserves to be shared long after one is gone," said Bartol.

"Our new name better represents the ultimate mission of our company, which is to capture and preserve people's life stories for current and future generations, and to provide convenient ways for friends and families to pay their respects," Bartol added.

**Legacy . com** memorials can be any length, and can include a photograph. The memorials may be written by families, by the **Legacy . com** editorial staff, or by funeral directors. In addition, **Legacy . com** allows families to easily add eulogies, other photographs and personal remembrances at any later date.

A lasting memorial  
Despite the ever-evolving landscape of the Internet, **Legacy . com** intends to have its memorials online forever. "We have a very strong technical infrastructure, which ensures that the **Legacy . com** site can maintain stored information indefinitely," added Bartol. "Further, a portion of each one-time fee for a lasting memorial is placed into a Permanence Fund, the proceeds from which will pay for ongoing storage and upkeep."

What makes **Legacy . com** so compelling is that individuals will now be able to easily pass on information about a loved one to geographically dispersed relatives and to new generations as well. While the person being remembered may have never used the Internet, he or she often has children and grandchildren who do.

**Legacy . com** works closely with area funeral directors to provide this

service to families. "Funeral directors play a very important role during the grieving process, and Internet-based obituaries provide them with yet another valuable way in which they can assist families interested in memorializing loved ones," added Bartol. In addition, **Legacy . com** memorials incorporate information about funeral services, including maps and directions, as well as facts regarding florists, charities, and relevant condolence gift services. There are currently more than 500 funeral homes nationwide offering **Legacy . com** , a number that is steadily growing as funeral directors and families embrace the idea of placing memorials on the Internet.

To service growing demand, **Legacy . com** currently has sales representatives in more than 15 markets working with funeral directors. According to Bartol, "We are aggressively hiring in order to have sales representation in place throughout the U.S. to address anticipated demand as we expand this concept nationally."

The company is also exploring strategic alliances. Bartol stated, "As a new economy media company, **Legacy . com** will continue to build collaborative relationships with other leading media companies which understand our mission. For example, we have established good relationships with most major newspapers that understand the Internet and the new economy."

In the past few months, **Legacy . com** has tripled in size, and Bartol forecasts ongoing exponential growth. "One day soon, it will be standard practice to memorialize people in a more expanded way on the Internet, " Bartol said. "Whether a loss is recent or occurred years ago, we want **Legacy . com** to be the place where memories are preserved."

A standard **Legacy . com** Memorial is available for a list price of \$145 for up to 1,000 words plus a photograph. Participating funeral directors may also place unlimited free "Legacy Notices," which are simple notices with funeral service information that remains online for 60 days. For more information, contact **Legacy . com** , LLC by phone at 888-397-9494, via fax at 888-397-3366, or visit <http://www.legacy.com> .

About **Legacy . com** , Inc.

Founded in 1998 and headquartered in Evanston, Illinois, **Legacy . com** , Inc. is dedicated to transforming traditional obituaries into full-length, lasting online memorials. Through its state-of-the-art Internet Website at [www.legacy.com](http://www.legacy.com) , **Legacy . com** has effectively redefined how families acknowledge and memorialize loved ones. Memorials can be found both at the company's former site, [www.obitdetails.com](http://www.obitdetails.com), as well as the new Web address, [www.legacy.com](http://www.legacy.com) .

TEXT:  
CHICAGO, Feb. 11 /PRNewswire/ - With just the click of a mouse, it is now possible to locate sought-after recent obituaries and death notices from across the country. **Legacy . com**, the Internet's leading publisher of online memorials and funeral service information, has launched ObitFinder(TM), the Internet's first and most powerful search engine tailored specifically to finding newspaper obituaries and death notices.

For no charge, visitors to ObitFinder(TM) at [www. legacy . com](http://www.legacy.com) can enter a person's name, an organization, a hometown, or any combination of key words to search an extensive network of recent listings from more than 1,200 online editions of newspapers. Search results link users directly to an online obituary or death notice.

The sophisticated search engine was developed as a response to geographically dispersed visitors seeking help locating obituaries. "This is a very powerful information tool," says Stopher Bartol, president and CEO of **Legacy . com**, Inc. "A wide range of users, including both individuals and organizations, can use this unique feature for either targeted or broad searches."

Launched in 1998, Evanston, Ill.-based **Legacy . com**, Inc. is a rapidly growing publisher of permanent online memorials and funeral service information. While many Internet companies attempt to erode newspaper market share, the business model of **Legacy . com**, Inc. supports its traditional media counterpart by helping visitors to access newspaper Web sites through links and search features. ObitFinder(TM) is the latest such feature available at [www. legacy . com](http://www.legacy.com). **Legacy . com**, Inc. recently announced an investment by Tribune Ventures and is in discussions with other potential partners.

TEXT:

CAMBRIDGE, Mass., Mar 7, 2000 (BUSINESS WIRE) - HeavenlyDoor.com Inc., (Nasdaq SmallCap: HVDC), the first publicly traded full service Internet-based company serving the funeral industry, in a continuing dedication to serving communities around the country, is providing initial online access to the obituary pages of ten leading newspapers in the U.S. Newspapers thus far linked with HeavenlyDoor.com are: The New York Times, The Boston Globe, The San Francisco Chronicle, The Arizona Republic, The Cleveland Plain Dealer, The Denver Post, The Houston Chronicle, The Seattle Times, The Chicago Sun-Times and the Joplin (MO) Globe. The HeavenlyDoor.com online newspaper link gives people in many communities the opportunity to review the obituary pages in the towns and cities they left, giving them the ability to find out about past neighbors, friends, or extended family who have passed on. In an easy to navigate format, visitors to HeavenlyDoor.com click on the "Newspaper Obituaries" button, then choose from a dropdown menu of linked newspapers. Once they have selected the desired newspaper, they click again and are linked to the newspaper's obituary page directly or to its classified pages that lead to the **obituaries**. They then **input** the name of the **deceased**. Since many newspapers archive their obituaries for years, Heavenlydoor.com's newspaper obit linking program brings those living outside their communities the opportunity to review, find out about and remember those they knew early-on.

Pre-need and at need funeral arrangements currently comprise a \$25 billion industry. Lloyd J. Kagin, President and CEO of HVDC commented: "The aging baby boomer population is becoming more and more comfortable with pre-need planning, whether for their parents or for themselves. More seniors are becoming Internet savvy every day." HeavenlyDoor.com offers a much-needed link to the funeral industry for the consumer, who can comparison shop and make arrangements without leaving home. HVDC plans to provide the first national business to business link for the entire industry, from funeral homes to cemeteries to monument manufacturers and sellers.

This new online site also provides the opportunity to send condolences through sympathy cards, flowers and an online gift shop, or to contact the funeral home directly. HVDC's next program is to initiate links with charities, to provide people with the opportunity to recognize a loved one through online donations.

Heavenlydoor.com.Inc. is a publicly held Internet company whose objective is to provide products and services for the elderly and aging baby boomer population, with an initial focus on the pre-planning of funerals, and ultimately the long-term care, assisted living and financial/estate planning industries. The company, through its subsidiary d/b/a Procept, Inc. is developing and seeks to out-license two biotechnology compounds, PRO 2000 Gel and O6-Benzylguanine, both of which have had substantial government support for their clinical trials to date.

**Virtual walls put face on casualties Vietnam Web tributes offer photos, bios**  
Beauprez, Jennifer  
Denver Post, p B.01  
Nov 26, 2001  
NEWSPAPER CODE: DPST  
DOCUMENT TYPE: News; Newspaper article  
LANGUAGE: English RECORD TYPE: ABSTRACT

ABSTRACT: [Dennis Gittinger]'s message is one of thousands posted on two websites - TheVirtualWall.org and VirtualWall.org - designed to memorialize the 58,226 people who died or went missing in the Vietnam War. Unlike the stark carvings of names at the Washington memorial, the virtual walls attempt to put a face with the names of those who died. TheVirtualWall.org website was started four years ago by Jan Scruggs, the organizer of the Vietnam Veterans Memorial Foundation, which created the Vietnam Veterans Memorial in Washington in 1982. Today, 30,000 tributes have been posted on TheVirtualWall site, and 2 million people visit each month. The Denver Post/Glen Martin [Jake Prideaux] holds a photo of his uncle, [Jim Prideaux] of Brighton - a Marine who died in the Vietnam War - at a downtown Denver Kinkos store. The company is letting patrons use computers and scanners free of charge to upload photos to TheVirtualWall.org.

May 17, 2000  
ISSN: 0190-8286 NEWSPAPER CODE: TWP  
DOCUMENT TYPE: FEATURES ; Newspaper article  
LANGUAGE: English RECORD TYPE: ABSTRACT

ABSTRACT: When mourners gathered last month for the funeral of 77-year-old Dorothy M. Reding, not all of them were in the room at Messinger Mortuary in Scottsdale, Ariz. More than two dozen watched over the Internet--many of them elderly relatives who could not make the trip from Ohio and elsewhere back East. **Death**, in other words, has come to the **Internet**, although not in the way that naysayers might have predicted. Hundreds of Web sites have sprung up, offering **online** memorials, obituary notices and other forms of homage to the **departed**. Customers now can order caskets, urns and funeral accessories as easily as they might order a compact disc. One site even offers the opportunity to leave behind a posthumous message, essentially e-mail from beyond the grave. Whatever the arrangement, the online memorial business is booming. HeavenlyDoor.com, a New York-based Web site that offers online testimonials, "virtual visits" to grave sites and other Internet services for funeral homes and individuals, is launching a \$5.5 million ad campaign to broaden its market. A New Zealand-based Web site, www.funeralstodiefor.com, will plan a customer's last rites down to the choice of music and type of flowers--and promises to help make the ceremony happen when the time comes.

LENGTH: Long (18+ col inches)

ABSTRACT: "It's a nice little **tribute**," (Noreen) Morrone said of Thai's permanent presence on the Web site of the Association for Pet Loss and Bereavement. "Every time I go online, I see her." "It addresses the need to honor the pet's memory that goes beyond the private," said Wallace Sife, a New York psychologist and founder of the Association for Pet Loss and Bereavement. "It offers consolation. It's a way of finding closure." The biggest such resource by far is the Virtual Pet Cemetery, run by a San Francisco multimedia company called LavaMind. The Virtual Pet Cemetery calls itself "the world's best known and most cherished online burial ground."

**Vietnam veterans flock to Web site to revisit Cybertouch: Former buddies can learn who "made it back" and post remembrances.**  
Hendrick, Bill  
Atlanta Journal Constitution, Sec B, p 1, col 1  
May 31, 1999  
NEWSPAPER CODE: ATCJ  
DOCUMENT TYPE: Feature; Newspaper  
LANGUAGE: English RECORD TYPE: ABSTRACT  
LENGTH: Long (18+ col inches)

ABSTRACT: His photo album from basic training in his lap, his fingers clickety-clicking across his computer keyboard, Max Falls punches in the names of old Army buddies on a new Internet site --- trying to find out how many didn't make it back from Vietnam as he did, 29 years ago. Methodically entering the names of the other 170 young men in his 1968 Fort Benning basic training company, and other servicemen he recalls, Falls repeatedly gets the comforting answer, "No matches." That indicates the soldier wasn't among the 58,219 slain in Vietnam. It's a cyberspace version of the Vietnam Veterans Memorial in Washington, listing all the names that are etched on the famous black-granite wall. **Web** surfers can call up the names of those who **died** in Vietnam, punch up details of their deaths and post **tributes**, including color photographs and sound recordings.

LENGTH: Medium (6-18 col inches)

ABSTRACT: At the bottom of the death notice -- in this newspaper -- of Maria Naumann, who died on Friday, March 13, was this simple statement: For additional information, please visit [http://www.page4.com /Maria](http://www.page4.com/Maria). Maria Naumann's **tribute** was created by her daughter, Nancy Forrest, a Washington-based Web page designer. The straightforward site displays photos and an adoration written by Forrest. In this age of video wills and interactive headstones, Web-based memorials are multiplying. **Online** perpetuity makes perfect sense. At once you can announce the **death** of a loved one and provide a place for people to go to pay their respects. Michael Stanley Kibbee understood this. Kibbee, a carpenter and an engineer, died last March in Toronto. One of his last projects was to build his own coffin; another was to create the World Wide Cemetery.

ABSTRACT: That was 31 years ago, during the height of the Vietnam War. Brown, 54, still sees her late husband, Sgt. Preston Tribble Jr., in her dreams. All three suffer the trauma of having lost a spouse to war. And all three have posted remembrances of their **dead** husbands on a new **Web** site, warwidows.org, the Widows of War Living **Memorial**, which is being launched today to mark this weekend's 25th anniversary of the end of the Vietnam War. The Web site was the brainchild of Barbara Sonneborn, 56, of San Francisco, an artist and filmmaker whose first husband, Jeffery Gurvitz, was killed in action in Vietnam in 1968. She finally dealt with her lingering grief by producing an Oscar-nominated documentary called "Regret to Inform," which aired on public television this year. Both the Web site and documentary have been funded by San Francisco-based Sun Fountain Productions, a nonprofit group founded in 1998 to help women fight against war, racism and violence.

ABSTRACT: Stopher Bartol thinks he can offer loved ones more than one day and 10 lines or so of print to memorialize a life. He offers families an

indefinite **memorial** accessible to millions across the planet on the Internet. For the last eight weeks, Bartol, a former management consultant, and six full-time staffers have been busily recruiting funeral homes, mostly on Chicago's North Side and in the northern suburbs. He now is making a push in the northwest suburbs and hopes to take the idea nationwide. Several dozen area funeral homes have agreed to offer the service when families are making funeral arrangements and planning newspaper death notices. The list price is \$145, though Bartol said most funeral homes are discounting the price as low as \$95.

**Treating Funerals in a New Way the Funeral Business Is Going Through a Time of Change. Americans Do More Advance Planning and They Cremate More, But They Spend Less. And Services Are Being Marketed in New Ways.**

Van Matre, Lynn

Chicago Tribune, Sec 2C, p 1, col 2

Jun 23, 1998

LENGTH: Medium (6-18 col inches)

ABSTRACT: But it is the only retail site for miles around--possibly the only place in Illinois--where folks can shop for sympathy cards and caskets, browse through books on grief, plan a funeral, set up a **memorial Web** site or arrange for the **deceased**'s remains to be sent into orbit, all in one stop. "We're not a typical funeral home, and this is not something that everyone is going to embrace immediately," acknowledged Richard Lamb, a Lisle resident and 35-year veteran of the funeral-service industry. A former president of the Blake-Lamb Funeral Homes business, founded by his father in 1929, Lamb launched the center last month with his wife, Susan Lamb, in a former sporting goods store. As Lamb sees it, Baby Boomers' continuing desire for more control over their lives, coupled with an increasingly mobile, fragmented and time-crunched society, means that a funeral resource center makes perfect 21st Century marketing sense. Lack of need for a large parking lot to accommodate funeral attendees also cuts overhead, allowing Lamb to lower prices. And unlike most traditional funeral homes, the center will provide price lists for everything from caskets to cosmetology services by mail or fax.

ABSTRACT: The Dead Web, the interlocking Web pages dedicated to the Grateful Dead, was a busy place after the death of the band's leader, Jerry Garcia, on Aug 9, 1995. The speed at which the Dead Web pages were transformed into memorials is a testament to the passion of fans and the ease with which World Wide Web pages can be kept current.

Drawing on the experience of running the Virtual Memorial Garden web site, this paper looks at some of the reasons why Internet memorials appeal to the thousands of people who have used the service it provides. Also touched on are the wider, social effects that this kind of use of the Internet may have in the future.

#### ABSTRACT

PROBLEM TO BE SOLVED: To automatically collect obituaries from composition information and edit them for a webpage or mail.

SOLUTION: In a local composition device 10, an **obituary** identification part 22 **searches** newspaper composition for special symbols indicating an obituary start and end to extract obituaries, and a related article collection part 24 **searches** the other article area of the newspaper composition and other newspaper composition created in a given period after the former composition as using the names of the **dead** identified from the obituaries as keys to extract related articles. A webpage edit part 38 of a center device 12 edits the obituaries and related articles for a webpage to publish them.

#### ABSTRACT

PROBLEM TO BE SOLVED: To support registering of obituary gifts, their totaling, designation of incense orders, making of a visitors list at a funeral hall concerning a computer system which supports the performance of a funeral.

SOLUTION: This system is provided with a memory domain which stores items including names, personal relationships to the **deceased**, amounts of money and incense orders, a personal relationship registration means which registers character sequences which indicate the classification of personal relationship inputted to the item of personal relationship, an **obituary** gift book **input** screen and an incense order **input** screen. The **obituary** gift book **input** screen of this system is provided with a retrieval and display means which retrieves the data when characters are inputted to the name items and displays the data if there are coincidence information, and the incense order input screen of this system displays the names by list in order of priority of the registered personal relationships or displays the list of names of the data in which the incense orders belonging to the designated personal relationships are not yet inputted and

the list of names of data in which the incense orders have already been inputted, and is provided with a setting means which selects the data displayed at a candidates display domain, inputs the incense order automatically and displays it in an incense order display domain.

#### ABSTRACT

PROBLEM TO BE SOLVED: To provide a method which manages information on the deceased and can automatically distribute information to the family of the deceased and people who made friends with the deceased on the deathday of the deceased and **memorial** days by managing information on the deceased.

SOLUTION: The deceased makes a contract with a company before his or her death, or his or her family, a friend, a relative, or the boyfriend or girlfriend, etc., makes a contract with the company to request the management and distribution of information on the deceased. The management cost, distribution cost, gift expendituress, etc., are paid when the contract is made or paid by the insurance, property left by the deceased, etc. The company after generating a database according to the information on the **deceased** provides a homepage on a server of the **Internet**. According to the database, **memorial** days such as the deathday, birthday, and wedding anniversaries are reported to the family, etc., through the Internet. The distributed information is mainly a message, a voice, and an image sent via the Internet, but a gift such as real flowers can be sent to the family, etc., by using door delivery. A virtual cemetery of the deceased can be provided in the homepage on the server.

#### ABSTRACT

PROBLEM TO BE SOLVED: To automatically notify relevant obituary.

SOLUTION: This obituary distribution system 1 consists of a WWW server 11, that stores and permits viewing of an **obituary** distribution registering page for **inputting** e-mail address of a person who wishes distribution 2 and a key work, an **obituary** information **input** page for **inputting** information on the **deceased**, when a funeral information providing person 3 obtains the obituary, and the like; a server 12 that stores information **inputted** on an **obituary** distribution registering page; and a mail server 13. This system has following functions which includes a retrieval processing function that retrieves the key word corresponding to the information on the **deceased** from key words stored in the server 12, when information on the **deceased** is **inputted** to this system via the **obituary** information **inputting** page; and a transmission processing function that transmits distribution of obituary e-mail describing obituary contents to the person who wishes distribution 2 having the e-mail address corresponding to the key word, when the corresponding key work is obtained.

NOVELTY - The system has stable stations for creating living **memorial** of himself and deceased person and for live telecasting of funeral or **memorial** services on internet. The system has media file storage facility linked to stable stations to alone users to store video or audio files and also incorporates a web crafting tool allowing a user to create site about himself or others.

USE - Online **memorial** system equipped with virtual **memorial** site creation facility.

ADVANTAGE - Enables users to mourn their recently passed loved one or to enter information about themselves for others to view after they have passed on.

Abstract (Basic): KR 2002006186 A

NOVELTY - A system for a funeral and a memorial related service is provided to supply a service as a funeral ceremony and a charnel house related service of an off-line form after an on - line subscriber's death and to supply a service as a notice of an acquaintance's death, a purchase of ritual goods, and a transmission of condolence money before the subscriber's death.

DETAILED DESCRIPTION - A service user PC(2) is connected to a server device(3) for supplying a service through an on-line network as the Internet(1). An off-line service as a funeral hall(4), a charnel house, an ancestral shrine culture succession(6), and a mortuary tablet enshrinement in an ancestral shrine(7) is connected through the server device(3). The user connects to the server device(3) through an on-line network as the Internet(1) and joins to a service. A service is supplied through the member joining process by classifying users into a member and a non-member. A service performed before the user's death and a service after the user's death are classified and supplied.

Abstract (Basic): US 20020032498 A1

NOVELTY - Data representing memorial information is input into

a computer and processed to provide instructions for controlling a routing machine. The memorial information (14) is routed into a surface of metal plate (12) consisting of bronze alloy, according to the instructions to provide a memorial product (10).

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) Computer controlled routing apparatus;
- (b) Memorial product preparation method;
- (c) Memorial product

USE - For computerized generation of memorial products with memorial information including designs and artistic work such as angels, religious emblem, floral designs, names, dates of birth and **death**, hand and foot print, poem, signature, etc.

ADVANTAGE - Avoids the time consumption and intensive labor techniques. Hence the memorial product can be customized more quickly and at a lower cost by recessing the memorial information.

DESCRIPTION OF DRAWING(S) - The figure shows a memorial product including recessed lettering a cast design.

JP 2002099641	A		7 G06F-017/60	

Abstract (Basic): JP 2002099641 A

NOVELTY - A computer terminal (1) creates a **memorial** site for the **deceased**, on the **internet** and receives digital audio/video information related to the **deceased**. The terminal designs the site based on the digital information and stores it in a memory (2) along with link information and information relevant to relatives, friends.

USE - For construction of virtual cemetery.

ADVANTAGE - The land which has restrictions physically like a stone etc., are not used, therefore without waiting in the grave, the **memorial** site of the required quantity can be established at required timing. Because the acquaintance who is the caller of a **memorial** site only accesses from an internet terminal, he is not concerned with factors like business, bad weather etc. The deceased is praised easily from a destination when planning, the new cemetery can be designed completely different.

DESCRIPTION OF DRAWING(S) - The figure shows a conceptual diagram of the virtual cemetery network. (Drawing includes non-English language

text).

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 20020022962	A1	35	G06F-017/60	CIP of application US 99322653

Abstract (Basic): US 20020022962 A1

NOVELTY - The **memorial** page including photograph of the **deceased** individual and identify text, is posted on the funeral home **web** site without any charge. A payment option symbol is provided on the **memorial** page or on a different web page linked to the **memorial** page to activate the payment option symbol for one or more payments.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for funeral home web site maintenance method.

USE - For maintaining **memorial** page in funeral home web site.

ADVANTAGE - Prevents display of unedited or incorrect information. Updates information easily as there is direct control over the content of the **memorial**.

DESCRIPTION OF DRAWING(S) - The figure shows the flow chart explaining the **memorial** page maintenance method.

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
JP 9154709	A		3		

Abstract (Basic): JP 9154709 A

The tablet includes a semiconductor memory (2) that records a voice, a letter, a photograph, and a videotape relating to a deceased person, as a digital information. The storage and read-out of the digital information from the semiconductor memory is controlled by a microcontroller (3).

A communication circuit (4) converts the read digital information to an infrared data signal which is transmitted by an infrared transmitter (6) and received by an infrared receiver (7).

ADVANTAGE - Provides information relating to deceased person. Allows mourners to know life of deceased person.

...SPECIFICATION A2

The present invention relates to the compilation and managing of memories of **deceased** individuals. In particular to a method and system that allows the compilation of images, text or other...

...a variety of unrelated sources and also allows controlled access by various individuals.

Today when an individual **dies**, a family member or close friend often **writes** an **obituary** with regard to that individual. However, these are typically written from a single point of view and are limited to the point of view of the **writer**. Also, information for these **obituaries** is generally taken at a time when the individuals providing the information are under an emotional stress...

...of view from a variety of different individuals, and therefore provides a more complete understanding of the **deceased**, that can be viewed and distributed in a wide manner.

The present invention seeks to solve these problems by utilizing a communication network, such as the Internet, for allowing people to **submit** and access an **obituary** library whereby text messages, images, sound and other data may be submitted and/or accessed by various...

...aspect of the present invention there is provided a method for capturing and distributing memories of a **deceased** individual, comprising the steps of:

providing an electronic storage memory database that can be accessed over a...

Detailed Description

Claims

Detailed Description

... provided for personalizing a space burial service. The method includes providing a server programmed to create a **web** site; providing a space vehicle having a **deceased** individual cargo section; and having an individual access the **web** site via the Internet at a local computer remote from the server. The method further involves inputting information via the **web** site related to a **memorial** service on behalf of the **deceased** and adapting an **online memorial** service based on the information **submitted**. In a further embodiment of the present invention, users participate in the **memorial** service by **submitting** statements on-line from remote computers connected to the computer network.

Additional aspects, advantages and novel features...user viewing of a) the launch itself (e.g., in space burial embodiments) and/or b) the **memorial** service. As also discussed further below, in other embodiments, terrestrial **memorials** can also be provided for the families and/or friends of the deceased (i.e., terrestrial counterparts...

...the deceased's information, launch information, pictures, capsule replicas or capsules with ashes, etc.); and/or b) **website** displays (e.g., having the **deceased** 's information, launch information, pictures, displays of **deceased** 's location, etc.).

In preferred embodiments, an **Internet web** site or other on-line graphical user interface is provided which includes, for example, on-line forms...540 upon which a user can "click" or otherwise select so as to be directed to an **on - line** form or the like to submit information pertaining to the **deceased** and/or information to be included within the **memorial** service. For example, one can submit: a) a biography, a statement, a eulogy or the like about...

...and/or the deceased's family, etc., and/or c) other information about or related to the **deceased**. In some preferred embodiments, as described below, information submitted can be presented on an **on - line memorial web page** for the **deceased** so as to create an **on - line memorial** for the **deceased**.

#### B, Selective **Memorial** Service Features

As shown in FIG. 5, the web page preferably includes a section 550 upon which...

...to be directed to an on-line form or the like to select assorted features of the **memorial** service. For example, users may be able to select one or more of the following: a) a...to provide statements, eulogies or the like in substantially real-time that are incorporated into a ceremony, **memorial** service or the like. In addition or alternatively, users may be able to submit pre-recorded statements..

...addition or alternately, in some cases, a prerecorded statement or the like may be provided by the **deceased** himself or herself. In the latter case, the **web** site preferably includes means by which an individual can pre-submit his or her statement or the...

...individuals to present statements (e.g., sequentially or the like). In this manner,

15

for example, a **memorial** service could include a basic **memorial** service presentation (e.g., by a priest, commentator or the like) and additional presentations by remote individuals...

...number of participants can be chosen (e.g., on-line) by the individual initially registering for the **on - line** service on behalf of the **deceased**. In addition, in some embodiments, the registering individual can select a particular time limit for the presentation...

...in example c), individuals can be added to a list of contributors that are posted on the **web** site along with information regarding the **deceased**.

#### F, Terrestrial **Memorials**

##### a) **Website Memorials**

According to preferred embodiments of the invention, the web site includes permanent or semi-permanent displays as **memorials** for the **deceased**. In this regard, the **web** site preferably includes a search engine or other means by which a name of an individual can be located in order to "click on" or to otherwise select the **memorial** for that individual.

Each web site **memorial** can include: a) images of the individual and/or the individual's family or friends, b) biographical...

#### Claim

... user interface accessible via the Internet or another computer network;

b) launching a space vehicle having a **deceased** individual cargo section;

c) accessing the web site via the **Internet** or computer network at a local

computer remote from the server;

d) inputting information via said web site related to a **memorial** service on

behalf of at least one of said **deceased** individuals; and

e) adapting an **on - line memorial** service based on said information submitted.

37 A method of user participation in **memorial** services for space burials, comprising:

a) providing a web site or other graphical user interface for...

...the Internet or via another computer network;

b) displaying a webcast via the web site of a **memorial** service on behalf of at least one **deceased** individual having remains included in a space burial mission; and  
c) having users participate in the **memorial** service by **submitting** statements on-line from remote computers connected to said computer network.

38 The method of claim 37, further including submitting the user statements in substantially real-time with the **memorial** service.

39 The method of claim 37, further including pre-recording and submitting the user statements in advance of the memorial service.

1

40 A method of personalizing a **memorial** service, comprising:

a) , programming a web site or graphical user interface accessible via the Internet or a...

...a local

computer remote from the server;

c) inputting information via said web site related to a **memorial** service on

behalf of at least one of said **deceased** individuals;

d) adaptin an **on - line memorial** service based on said information **submitted** .

.9

28

. A method of user participation in **memorial** services, comprising:

a) providing a web site or other graphical user interface for users to access

via the Internet or via another computer network;

b) displaying a webcast via the web site of a **memorial** service on behalf of at

least one **deceased** individual; and

c) having users participate in the **memorial** service by **submitting** statements on-line from remote computers connected to said computer network.
